MonitorAI v1.5 FileMaker Database Design

Version: 1.5 REV2

Status: FINAL BASELINE

MonitoringSessions

Additional Fields

DeviceModelIdentifier

Type:

Text

Example:

iPhone16,2

iPhone17,1

Purpose:

Hardware-specific analysis

CaptureImages

Additional Fields

ImageWidth

Type:

Number

Purpose:

Image dimension storage

ImageHeight

Type:

Number

Purpose:

Image dimension storage

ImageSizeBytes

Type:

Number

Purpose:

Dataset validation

ImageSHA256

Type:

Text

Indexed:

Yes

Purpose:

Duplicate detection

Image integrity verification

AI dataset validation

CaptureMetadata

Additional Fields

AppBuildNumber

Type:

Text

Purpose:

Version traceability

BatteryLevel

Type:

Number

Range:

0-100

Purpose:

Performance analysis

Torch diagnostics

NetworkType

Type:

Text

Value List:

WiFi

5G

4G

Offline

Unknown

Purpose:

Upload analysis

UploadAttemptCount

Type:

Number

Purpose:

Offline queue analysis

Retry analysis

Relationship Changes

No changes.

Existing relationships remain valid.

Index Changes

Additional Indexed Fields

CaptureImages::ImageSHA256

MonitoringSessions::DeviceModelIdentifier

CaptureMetadata::NetworkType

Dataset Integrity Rule

Every accepted image must store:

ImageWidth

ImageHeight

ImageSizeBytes

ImageSHA256

before upload completion.

Final REV2 Principle

Every image must be traceable and verifiable.

Dataset integrity takes priority over storage simplicity.
